

AERIEPORT – AUTONOMOUS NESTING SOLUTION

Feature	Specification
Operating Radius	10 km
Temp Range	-30°C to 50°C
Power Options	120V Grid or Off-Grid Solar
Operation	Fully Autonomous or Remote via C2 Webpage

The Aerieport (Volatus Dock) is an agnostic nesting station that enables 24/7 autonomous operations, providing persistent security and surveillance without the need for on-site personnel.

Key Capabilities

Persistent ISR:

Facilitates automatic deployment, docking, and recharging for continuous aerial coverage.

Versatile Deployment:

Mountable in fixed positions or on mobile platforms for border security or complex terrain.

Integrated Defence:

Fully combinable with air defence apparatus for a complete, unmanned perimeter protection solution.
