

**CANARY – TACTICAL CARGO & PRECISION DELIVERY**

Canary Deployed In Combat Deployment

Canary is a combat-proven tactical cargo UAS optimised for "last-mile" resupply. It is a mature, resilient system integrated with the latest military C2 ecosystems for seamless battlefield awareness.

**Key Capabilities:**

**Precision Logistics:** Ideal for rapid delivery of medical supplies or ammunition; the sliding door ensures reliable payload release even when not opened to a full 90 degrees.

**Strike Adaptable:** Specifically modifiable for mounting and deploying Switchblade 300 munitions.

**Proven Resilience:** Maintained via specialised shade and warmth protocols; communication remains stable even in extreme high-heat environments.

**Safety & Redundancy:** Includes maximal EW resistance and a failsafe parachute system.

Feature	Specification
<b>Payload Box Dimensions</b>	Max 12" x 9" x 6"
<b>C2 Architecture</b>	Auterion Mission Control (ATAK Compatible)
<b>Connectivity</b>	High-speed LTE Modem (SatComm redundancy ready)
<b>Payload Mechanism</b>	Integrated rear-sliding drop door
<b>Max Speed / Range</b>	72 km/h / 28 km
<b>Maintenance</b>	AMM regular maintenance (proven in Edmonton operations)
