KEY OPTIONS PTY LTD CORPORATE DECLARATION

14 September 2026

Supplier and Supply Chain Assurance

Key Options Pty Ltd provides this declaration in response to recent media reporting concerning KeyOptions' relationship with Skycope C-UAS Technologies Inc., Skycope's historical association with Shenzhen Shengkong Technology, and the origin and supply chain of products integrated and supplied by KeyOptions as part of the SkyControl C-UAV suite.

The reporting has also raised questions regarding the integration of Skycope manufactured products within the broader SkyControl C-UAS ecosystem. Given the security and intelligence environments in which KeyOptions operates, the security and integrity of our technologies, suppliers and supply chain are important considerations in the selection and ongoing management of our technology partners. KeyOptions reviews information provided by its suppliers, together with other available information, when assessing supplier and supply-chain risks. In relation to Skycope, KeyOptions has reviewed information provided regarding its ownership, corporate history, manufacturing and supply-chain arrangements.

Skycope has advised KeyOptions that its association with Shenzhen Shengkong Technology ended in 2018. Based on the information provided to KeyOptions, we are not aware of any current ownership or control relationship between Skycope and Shenzhen Shengkong Technology.

Skycope has provided KeyOptions with a formal declaration stating that it is wholly Canadian-owned and Canadian-controlled, and that its passive RF detection products are designed, manufactured, assembled and tested in Canada. It further states that major hardware components are sourced from Canada and the United States and that its software is developed and installed in Canada.

Skycope has further advised that the firmware and drone-signature library supporting these products are developed, maintained and updated in Canada and deployed through Skycope software updates. SkyControl is KeyOptions' overarching C-UAS brand, representing a layered ecosystem that integrates multiple detection, identification, command-and-control and mitigation capabilities.

Skycope-manufactured sensors and effectors are part of the SkyControl C-UAS ecosystem and are supplied by KeyOptions under the SkyControl brand, alongside other technologies and capabilities. KeyOptions continues to review its supplier relationships and supply-chain arrangements as technologies and customer security requirements evolve.

This declaration is provided to clarify KeyOptions' position regarding the matters raised in recent media reporting and the C-UAS capabilities supplied to its clients.
